Dear Person,

1 [I am writing to express my concern about plans to store nuclear waste at Yucca Mountain. I fully oppose these plans. I do not believe the waste can be stored safely for the many thousands of years that would be required. We have a duty to future beings to protect our planet Earth and leave them a planet that is healthy. Dumping nuclear waste underground is a violation of that duty.

Also, the land belongs to Indigenous people and we don't have the right to use it as a toxic dump.]

Please pass my comments along to the appropriate authorities.

thank you, Marcus Sims
